Tamil  
English

## PROJECTS

### MUSCLE CRAMP DETECTION ML MODEL - L&T TECHGIUM

August 2023 — January 2024

A Machine Learning Model has been developed to analyze user data and detects the occurrence of muscle cramps before they manifest. This futuristic model leverages the powerful Random Forest algorithm, which has yielded an impressive accuracy score of 85.71%.

### CAR KEY FOB REPLY ATTACK - CYBER SECURITY

October 2022 — November 2022

Developed and executed a comprehensive cyber security awareness project showcasing hackers gaining unauthorized vehicle access via open frequencies, leveraging a Raspberry Pi for practical demonstrations. It was explained to the students by showing a live demonstration which resulted in a 40% increase in students' knowledge and awareness.

## HOBBIES & INTERESTS

Music  
Learning something new  
Sports/Workout  
Exploring

## ACHIEVEMENTS

### Programming Date in Techutsav22, Rajalakshmi Institute of Technology - Ist

Won first place in a programming contest held at the Techutsav22 symposium in my college of study.

### Ideathon in Hackerz22, Chennai Institute of Technology - Illrd

In the symposium held at Chennai Institute of Technology, I submitted an idea for a project incorporating a GPS-enabled alarm system and got third place in the competition.
